COMPANY PROFILE

Barito Bahalap Agency

Technology and strategic communications under clear governance, for institutional partners. Palangka Raya, Central Kalimantan.

Overview

Barito Bahalap Agency (BBA) is the holding company for two operating divisions. BBA's role is limited to cross-division corporate functions: strategy, contracts and business relationships, finance, legal compliance, and risk and reputation management.

BBA serves corporations, state-owned enterprises (BUMN/BUMD), government institutions, public figures, and institutional partners through contract-based engagements, clear scope, and measurable deliverables.

Barito Bahalap Tech	Barito Bahalap Media
Technology & Digital Infrastructure	**Media & Strategic Communications**
A long-term digital infrastructure partner.	A professional communications operation for institutions.
- Custom software and information systems	- Strategic communications and media relations
- Operational dashboards and process automation	- Editorial and publication management
- Technical support and retainers	- Multimedia production and social media

Structure

BBT and BBM sit within one group but run as two functionally separate divisions. Technical decisions rest with BBT's Delivery Lead; editorial decisions rest with BBM's Creative Lead. The separation is a governance framework, not a marketing strategy.

Operational Firewall: seven dimensions of separation

Brand identity	Distinct names, logos, channels, and positioning. No combined marketing material.
Teams	Separate technical and editorial work lines; cross-division assignments are need-to-know.
Client accounts	One division's client information is not shared with the other without client consent.
Data and information	Project documents and data are stored and accessed separately.
Decision-making	Technical and editorial decisions run independently.
Editorial independence	The Founder/Director is not BBM's day-to-day editorial decision-maker.
Legal and reputation oversight	Handled at holding level without overriding divisional decisions.

For activities that qualify as press publishing, BBM's editorial function observes Law No. 40 of 1999 on the Press and its implementing regulations.

How we engage

Discovery, proposal and contract, delivery in stages each closed by a Handover Report (BAST), then support and retainer under an agreed service level.

Confirmed track record (BBT)

The following engagements are confirmed.

Client / Project	Scope	Status
PT Telkom Indonesia (Regional 3), RSO2 Telkom Dashboard	Analytical and operational dashboard with automated reporting	Ongoing retainer
E-Palugada, Kasongan, Central Kalimantan	Web-based delivery platform for the local market	Active
AMPI Central Kalimantan	Official website and organization management platform	Active

BBM is in an early stage of operational development. Track record will be published progressively once initial engagements are complete and clients have given consent.
